Dear: Hiring Manager,

I am excited to submit my application to your organization. With a Bachelor of Science in Information Technology and 3 years of hands-on experience designing intuitive, user-centered digital experiences, I combine front-end knowledge in HTML, CSS, and basic JavaScript with expertise in Figma and Adobe Creative Suite. I create designs that are functional, visually engaging, and aligned with development needs, passionate about bridging the gap between design and code.

In my previous work, I have led UI/UX design for enterprise and public sector projects, including web platforms, municipal websites, and enterprise applications, ensuring usability, accessibility, and alignment with business goals. My background in IT support has strengthened my problem-solving skills and attention to detail, which informs my practical, user-focused approach. I am happy to present my portfolio upon request; due to NDAs, not all work can be shared publicly, but I can showcase examples confidentially during the interview process.

I would be thrilled to bring my creativity, technical expertise, and user-centered approach to your team. Thank you for considering my application, I look forward to the opportunity to contribute to your organization.

Kind regards,

X 

Phemelo Kolobe

PHEMELO KOLOBE

UI/UX Designer | Front-End Developer | IT Support Technician
Pretoria, South Africa, 0001 | +27 67 338 7059 | bpkolobe@gmail.com | linkedin.com/in/p-kolobe

PROFESSIONAL EXPERIENCE

Providence Software Solutions — UI/UX Designer / Front-End Developer
May 2024 – April 2026 | Johannesburg, South Africa

- Designed end-to-end UI/UX for Phase 2 of the SABC e-Tender Management System, enabling users to apply online, upload documents, and track submissions in real time.
- Developed a dynamic form-filler for the SAPS Firearm Control Management System, automating 60+ application forms and reducing manual effort.
- Delivered intuitive UI/UX designs for Microsoft Marketplace applications including Security Operations Center, Mobile Device Management, Digital Workplace Solution, Smart Building Solution, and ERP systems.
- Created UI/UX screens for municipal and corporate websites, including City of Polokwane Facility Booking, City of eThekwini, Joburg Market Digital Payment Solution, Harry Gwala Development Agency, and Ubuhlebezwe Municipality.
- Produced brand collateral including logos, banners, and marketing materials using Adobe Illustrator, ensuring visual consistency and alignment with brand identity.

Zee-CN Trading & Projects — IT Support Technician / UI/UX Designer
Jan 2023 – Apr 2024 | Pretoria, South Africa

- Diagnosed and resolved hardware and software issues across company systems, supporting staff with configurations, installations, and troubleshooting.
- Managed and maintained secure networks to ensure reliable connectivity.
- Designed the company's first website, conducting UX research, creating wireframes, visual designs, and defining user flows to showcase services effectively.
- Produced business documentation including quotation and invoice templates, streamlining internal workflows.
